

Report on asset quality  
of the cover pool and on outstanding covered bonds  
as of June 30, 2023

Caisse Française de Financement Local  
(Instruction n° 2022-I-04 of March 9, 2022)

In compliance with Instruction No. 2022-I-04 of March 9, 2022, the report on asset quality aims at presenting information on:

- all of the assets comprising the cover pool of Caisse Française de Financement Local, excluding accrued interest,
- the outstanding *obligations foncières*
- the framework for managing interest rate, exchange, liquidity and credit risks.

As of June 30, 2023, Caisse Française de Financement Local's cover pool is made of:

- exposure on public sector entities amounting to EUR 58.3 billion (of which EUR 53.3 billion of loans, EUR 0.7 billion of cash deposits with Banque de France and EUR 4.3 billion of bonds), and
- exposure on credit institutions (bonds, exposures and deposits) amounting to EUR 1.4 billion.

The detail of the cover pool is presented in the table below:

EUR thousands, as of 6/30/2023	Total cover pool	Assets removed from the cover pool	Total Outstanding
Exposures on public sector			
-Loans (except cash deposits with Banque de France)	53,696,898	359,571	53,337,327
-Cash deposits with Banque de France	709,094	-	709,094
-Bonds	4,316,749	-	4,316,749
Other exposures: Exposures to credit institutions Bonds, exposures and deposits	1,373,751	-	1,373,751
Collective impairment	- 19,438	-	- 19,438
<b>TOTAL</b>	<b>60,077,054</b>	<b>359,571</b>	<b>59,717,483</b>

As a *société de crédit foncier*, Caisse Française de Financement Local can access the refinancing possibilities offered by the Banque de France to banks. Within the framework of the management of its cover pool and its cash, Caisse Française de Financement Local can thus remove some assets from its cover pool and pledge them to the central bank to obtain funding from tenders organized by the Banque de France. Caisse Française de Financement Local did not use this possibility over the course of the last three years (with the exception of operational access tests, regularly implemented) and no asset has been pledged to the Banque de France as of June 30, 2023.

Some assets held by Caisse Française de Financement Local may also be removed from the cover pool if they become non-eligible, before being sold or matured.

The *obligations foncières* issued by Caisse Française de Financement Local are in line with the eligibility criteria required by the European Central Bank for refinancing and also comply with the covered bond directive and the CRR/CRD IV regulation.

## 1. MORTGAGE LOANS

Caisse Française de Financement Local has no guaranteed nor mortgage loans in its cover pool.

## 2. EXPOSURE ON PUBLIC SECTOR

## 2.1 BREAKDOWN BY COUNTERPARTY

In the table below, direct exposures refer to exposures on public bodies and indirect exposures to exposures fully guaranteed by public bodies. Exposures in a foreign currency are converted into euro using the exchange rate of the hedging swap. Loans and bonds are presented after specific impairments and are off premium / discount. The total amount of these exposures is presented net of collective impairment.

34	19	35,829
35	10	27,662
36	6	24,895
37	2	20,074
38	1	6,353
41	9	25,105
	<b>38,402</b>	<b>58,585,256</b>
TRANSLATION ADJUSTMENTS		- 222,086
Non allocated collective impairment		- 19,438
<b>TOTAL</b>		<b>58,343,732</b>

(1) Number of loans and bonds maturing during the period.

The first period (maturity date in 0 year) includes the balance of Banque de France account.

## 2.4 EARLY REPAYMENTS

EUR thousands, as of 6/30/2023

<b>COUNTRY</b>	<b>Early repayments during the year 2023</b>	<b>Rate of early repayments</b>
- Export credit refinancing	56,780	0.84%
- Local public sector	53,321	0.10%
<b>GLOBAL exposure on public sector</b>	<b>110,101</b>	<b>0.18%</b>

The rate of early repayments for the year 2023 corresponds to the volume of early repayments occurred over the year divided by the average outstanding amount (equal to the arithmetic average amount of daily outstanding over the period).

In 2022, the rate of early repayments for this entire year was 0.44% for a total amount of repayments of EUR 257 million.

## 3. OTHER EXPOSURE: EXPOSURE ON CREDIT INSTITUTIONS

## 3.1. BREAKDOWN BY COUNTERPART

EUR thousands, as of 6/30/2023	Country	Amount
<b>Step 1 credit rating</b>		
Covered Bonds		
	France	334,475
	Other countries	475,917
Other Bank bonds		
	France	21,000
	Other countries	258,000
Loans to SFIL	France	-
Bank accounts' balances	France and other countries	3,773
<b>Step 2 credit rating</b>		
Covered Bonds		
	France	-
	Other countries	-
Other Bank bonds		
	France	181,000
	Other countries	95,000
Bank accounts' balances	France and other countries	4,585
<b>Step 3 credit rating</b>		
Bank bonds (Maturity < 100 days)		
	France	
	Other countries	
Bank accounts' balances	France and other countries	
<b>TOTAL</b>		<b>1,373,751</b>

Other exposure corresponds mainly to cash investments made of bonds, covered bonds or certificates of deposit issued by credit institutions. This section also includes bank accounts' balances in different currencies. It can also include loans that Caisse Française de Financement Local grant to SFIL, its parent company, in order to invest its surplus cash.

Derivative instruments included in the cover pool are recognized off-balance sheet and therefore do not appear in the table of exposures to credit institutions on the asset side of the balance sheet.

Bank bonds are presented after specific impairments and are off premium / discount.

No non-performing or litigious loans are included among these exposures.

### 3.2 RATINGS

In order to be eligible to the cover pool, exposure on credit institutions should benefit from ratings corresponding to a step 1 or step 2 credit rating, or, when their maturity is less than 100 days and when they are in the form of short-term deposits used to meet the cover pool liquidity buffer requirement, a step 3 credit rating.

Volume limits are applicable to these exposures depending on their rating. However, assets that contribute to the minimum level of over-collateralization of 105% are not subject to these limits.

As of June 30, 2023, all these conditions are completed.

### 3.3 BREAKDOWN BY MATURITY DATE

EUR thousands, as of 6/30/2023

Residual maturity		
Maturity date in years	Number of deals <sup>(1)</sup>	TOTAL
0	4	78,329
1	8	507,422
2	6	187,000
3	3	97,000
4	4	102,000
5	3	187,800
8	1	34,000
10	2	180,200
<b>Total</b>	<b>31</b>	<b>1,373,751</b>

(1) Number of loans and bonds maturing during the period

Balances of bank current accounts are presented as a unique matured deal with a maturity of less than 1 year.

### 3.4 EARLY REPAYMENTS

No early repayment occurred neither during the year 2023, nor during the whole year 2022.

### 3.5 AMOUNT OF SECURITIES, SUMS AND VALUES RECEIVED AS COLLATERAL FOR HEDGING TRANSACTIONS

The amount received as collateral for hedging transactions consists solely of cash and is fungible with the rest of the company's cash. The debt for restitution of the cash collateral received as of March 31, 2023 amounts to EUR 93.2 million.

## 4. LIST OF INTERNATIONAL SECURITIES IDENTIFICATION NUMBERS (ISIN)

The table above presents the list of International Securities Identification Numbers (ISIN) for all issues of *obligations foncières* to which an ISIN code has been assigned, and the contract number for private placements made in the form of registered covered bonds (RCB). For each of these securities, it is indicated whether or not ("Yes" or "No") it has been awarded the "European Covered Bond Premium" label.

All of Caisse Française de Financement Local's issuances comply with the requirements of the new Covered Bonds Directive, article 129 of the CRR and article 52 4 of the UCITS directive. In this respect, *obligations foncières* issued after July 8, 2022, which are labelled "European Covered Bond (Premium)" and *obligations foncières* issued before that date, all benefit from the best possible financial and regulatory/prudential treatment.

## 5. EXPOSURE TO MARKET, CREDIT AND LIQUIDITY RISKS

### 5.1 INTEREST RATE RISK

#### Interest rate risk management:

Caisse Française de Financement Local has defined a fixed-rate risk appetite, which is broken down into a system of limits governing the sensitivity of the net present value (NPV). In order to manage this sensitivity within the limits set, Caisse Française de Financement Local has implemented the following hedging strategy:

- micro-hedging of interest rate risk on balance sheet items denominated in a currency other than the euro or indexed to a complex interest rate structure. Certain euro-denominated vanilla transactions may also be micro-hedged if their notional value or duration could lead to a sensitivity limit being exceeded. Micro-hedging is carried out exclusively by swaps;
- macro-hedging of interest rate risk for all transactions that are not micro-hedged. The transactions concerned are mainly (i) loans to the local public sector and (ii) issues of *obligations foncières* denominated in euros. This macro-hedging is obtained as much as possible by matching fixed-rate assets and liabilities *via* the unwinding of swaps and, for the rest, by setting up new swaps against Euribor or €str.

This fixed-rate risk management is supplemented by monitoring of the fixings of operations at adjustable rates in order to ensure that they do not lead to the sensitivity limit being exceeded. Where appropriate, swaps against €str may be entered into to hedge the fixing risk.

These hedges can be entered into either directly on the market by Caisse Française de Financement Local, or through Sfil, which in turn hedges its resulting position in the market.

Non-privileged debt is not hedged. Debt contracted by Caisse Française de Financement Local with its shareholder to finance over-collateralization is borrowed directly with a €str index and does not need to be swapped. Short-term debt owed to the Banque de France with a fixed rate (if any) is not hedged, but finances fixed rate assets.

These different kinds of interest rate risks are analyzed and managed through:

- the monitoring of index gap and floored euribor gap:

<b>Index gap</b>	Difference between balance sheet and off-balance sheet assets and liabilities for operations indexed on euribor. This gap is projected until the balance sheet is extinguished.
<b>Floored euribor gap</b>	Difference between balance sheet and off-balance sheet assets and liabilities, for transactions indexed on floored euribor. This gap is projected until the balance sheet is extinguished.

These indicators are calculated in static vision.

Index gaps are used to monitor exposure to euribor versus €str basis risk. These gaps are framed for each tenor index by a limit calculated on the average of the different 12-month gaps. As of June 30, 2023, the limits are respected.

Floored Euribor gaps are used to monitor exposure to option risk. For Caisse Française de Financement Local, most of this risk is attributable to the floors of commercial loans indexed to euribor. This optional risk is hedged by swap. The net position (after swaps) is subject to a limit on the gap of EUR 800 million.

- o The monthly production of net present value (NPV) sensitivity indicators.
- Measurement of interest rate position:

The fixed interest rate position is measured by modelling a fixed rate gap based on the flow of balance sheet and off-balance sheet transactions at fixed rates. It is calculated for each time interval as being equal to the difference between the average outstanding fixed rate assets and the average outstanding fixed rate liabilities. To be noted:

- the current fixing of adjustable rate transactions is included in the fixed rate gap,
- the investment of equity, represented by internal contracts, is included in the fixed rate gap,
- premiums and discounts related to derivatives, which are amortized in the accounts, are also included in the fixed rate gap

Caisse Française de Financement Local's interest rate position as of June 30, 2023 is as follows:

- Sensitivity of the rate position:

In order to manage the fixed interest rate risk, Caisse Française de Financement Local implements a risk management system which is mainly based on the risk indicator in economic value (sensitivity of the so-called "management" net present value (NPV)): This indicator is produced monthly and is calculated for eight interest rate shock scenarios (the six scenarios used to calculate the regulatory 'outlier' ratio, defined by the EBA, and two 'internal' stress scenarios revised once a year after analysing the economic and financial situation and determined on the basis of historical variations in interest rates). The maximum loss observed in these two scenarios must not exceed the limit defined in the interest rate risk appetite

framework. Equity is taken into account in the calculation of this indicator.

Sensitivity (EUR mns)	12/31/2022	6/30/2023
"Outlier" regulatory scenario of a 200bp rate increase	1.3	-0.6
"Outlier" regulatory scenario of a 200 bp rate decrease with application of a floor	-21.1	2.9
"Outlier" regulatory scenario of a increase in short-term rates	-9.2	-12.9
"Outlier" regulatory scenario of a decrease in short-term rates with application of a floor	8.2	13.3
"Outlier" regulatory scenario of flattening of the rate curve with application of a floor	-11.0	-12.5
"Outlier" regulatory scenario of steepening of the rate curve with application of a floor	10.5	13.4
Internal rate curve flattening scenario	-16.6	-24.6
Internal rate curve inversion scenario	-31,4 (*)	-17.9

(\*) pro forma

The two internal scenarios combine the risk of a rise in rates with the risk of a slope (flattening and steepening). These scenarios have been defined on the basis of historical interest rates. Unlike the regulatory ratios, equity is taken into account in the calculation of these indicators. They may be adjusted each year depending on the economic situation and expected changes in interest rates.

Assets portfolios for which the strategy is to be entirely hedged are not sensitive to interest rates changes and thus are not integrated in the calculation of the global sensitivity of Caisse Française de Financement Local's balance sheet.

## 5.2 EXCHANGE RATE RISK

Caisse Française de Financement Local's foreign exchange risk management policy is to incur no foreign exchange risk.

It enters into swaps against the euro for the assets and issues denominated in foreign currencies, on initial recognition at the latest and until their final maturity, thereby ensuring that these balance sheet items' principal and interest are hedged.

As an exception to this policy, foreign exchange positions, limited in terms of time and volume, are accepted for operational reasons, particularly in the context of the refinancing of export credits. This corresponds to the following situations:

- operational cost of hedging swaps too high in relation to the risk to be hedged (low amount of drawdowns entered on the balance sheet, non-standard index to be hedged, etc.)
- impossibility of perfectly micro-hedging off-balance sheet drawdowns, the amount and timing of which are, by definition, unknown
- payment of a commission in a currency other than the euro.

The risk resulting from these foreign exchange positions is monitored using the total net foreign exchange position in each currency, calculated on all receivables, payables and off-balance sheet commitments. Net positions are subject to a very low foreign exchange limit.

### 5.3 MARKET RISK

Certain positions or activities in the banking portfolio of Caisse Française de Financement Local, even if they do not carry any market risk in the regulatory sense of the term, are nevertheless sensitive to the volatility of market parameters and pose a risk to the accounting result or on equity; they are monitored for non-regulatory market risks.

This concerns mainly the following, under IFRS:

- the assets recorded at fair value through profit or loss or through equity, the value of which can fluctuate;
- cross-currency and basic swaps hedging the export refinancing activity in currency, the changes in value of which may impact earnings or equity depending on the IFRS hedging method used;
- derivatives, of which the book value adjustments like the CVA (Credit Valuation Adjustment) and the DVA (Debit Valuation Adjustment), are recorded through income pursuant to IFRS;
- certain derivatives classified as hedges according to IFRS, for which there may be a difference between the valuation of the hedged risk and the valuation of the hedging item (derivative), which are valued using different yield curves.

In French GAAP, this also concerns “placement” securities, the losses in value at closing date of which are provisioned.

### 5.4 LIQUIDITY RISK

Caisse Française de Financement Local's management makes it possible to provide a structural coverage of its liquidity needs by assets eligible for refinancing by the Banque de France, until the full amortization of the privileged liabilities.

Caisse Française de Financement Local has its own resources and can by order of priority :

- Use the excess cash available. As of June 30, 2023, they amount to EUR 727.4 million before taking into account the assumption of non-performance of assets;
- Carry out a covered bond issue;
- Have additional drawings from its parent company within the framework of the financing agreement;
- Assign, obtain reimbursement or give as a guarantee to the Banque de France, to obtain financing during calls for tenders, the following assets:
  - Exposures to credit institutions. As of June 30, 2023, these amount to EUR 1,365.4 million including EUR 795.2 million in high-quality liquid securities (level 1, 2A or 2B).
  - High quality liquid securities (level 1, 2A or 2B), excluding bank securities. As of June 30, 2023, these amount to EUR 2,418.1 million.
  - Other assets which are directly eligible for refinancing from the Banque de France. As of June 30, 2023, these amount to EUR 35,327.1 million, before haircut.

As of June 30, 2023, Caisse Française de Financement Local thus had approximately EUR 39,838.0 million in liquid assets or assets eligible for refinancing by the Banque de France, including its cash deposited with the bank or the Banque de France. There are no legal obstacles likely to prevent the use of a part of these assets in compliance with Articles L. 513-12 and R. 513-8 of the Monetary and Financial Code.

Moreover, Caisse Française de Financement Local monitors that, at any time, its liquidity need over a 180-day period, calculated in a run-off situation, is covered firstly by high quality liquid assets (level 1, 2A or 2B) and, secondly, by short-term exposures on credit institutions benefiting from the best or the second best

step of credit quality, or the third best credit quality step for short-term deposits. Unsecured receivables deemed to be in default, in accordance with Article 178 of Regulation (EU) No. 575/2013 of June 26, 2013, cannot participate in covering cash requirements.

Cash needs are defined as repayments of *obligations foncières* and registered covered bonds (RCB), of debts that do not benefit from the legal privilege and forecasts of repayment of the cash collateral received, after deduction of amortization cash flows from assets, taking into account cash flows from hedging derivatives. As of June 30, 2023, the liquidity situation at 180 days shows a cash surplus over the first three months (with a maximum of EUR 1.3 billion in September 2023) and a cash requirement over the last three months (with a maximum requirement of EUR 1.0 billion by the end of September 2023). Over the period, liquidity needs are covered at all times by available liquid assets (see chart below). In addition, specific management measures may be taken to cover the needs (for example, the completion of a new bond issue or the use of central bank financing).

The movements observed correspond to cash flows from amortization of *obligations foncières*, cash collateral, non-privileged liabilities, derivatives and assets.

The projection of the cash balance at 180 days is calculated on the basis of the contractual schedule of interest flows and nominal amounts of the assets and liabilities present in the balance sheet of Caisse Française de Financement Local at June 30, 2023. Furthermore, this projection takes into account flows related to certain operations but beginning after the closing date.

Caisse Française de Financement Local does not hold any financial assets that include maturity extension triggers. It has not issued any *obligations foncières* that include maturity extension triggers. Certain *obligations foncières* include call options that can only be exercised by Caisse Française de Financement Local.

The assumptions used for the calculation are as follows:

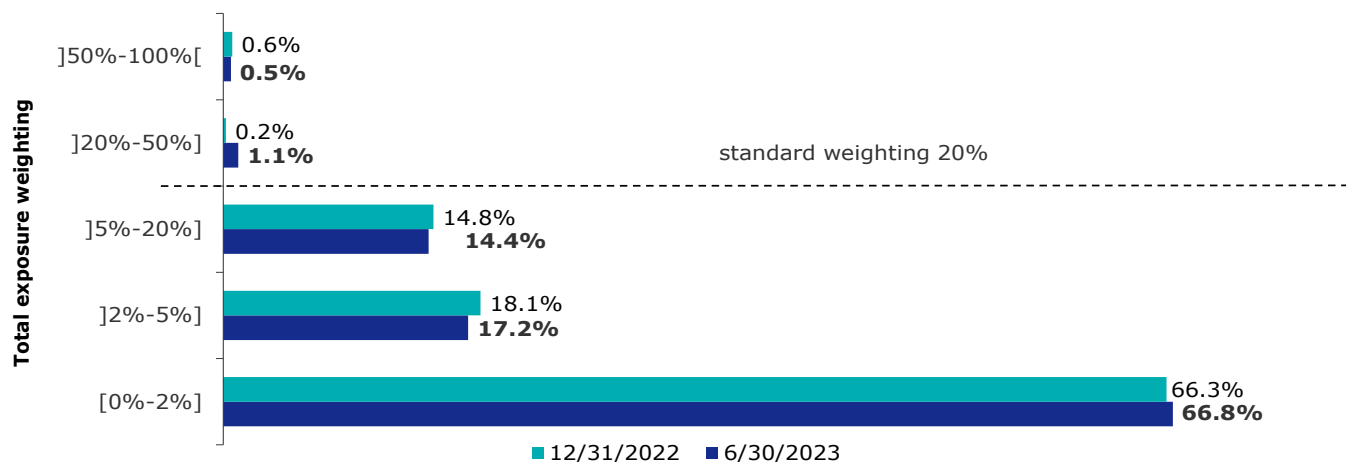

- No voluntary early repayment on commercial loans in accordance with the assumptions used in ALM management, nor exercise of options on securities held by Caisse Française de Financement Local. From a liquidity point of view, this is therefore the worst case scenario.
- Modelling of liabilities with an early redemption clause in hand with Caisse Française de Financement Local: case-by-case analysis of options exercisable over 180 days. It should be noted that there are no liabilities on Caisse Française de Financement Local's balance sheet that include an early repayment clause in the hands of the investor.
- Cash guarantees received from counterparties for hedging derivatives (cash collateral or variation margin) are presented on the basis of future cash flows and by projecting the market value of the underlying transactions at unchanged market conditions. In concrete terms, for each framework agreement, a projection of the valuation of the swaps is made taking into account the flows of interest and capital remaining to be received and paid until the maturity of the swaps. The amount of cash collateral to be paid or received over the next 180 days is determined on the basis of this valuation.
- Projection of variable rate interest flows based on the last known fixing for the first payment of interest and the projected rate for the following flows.
- Estimate of the non-performance of assets based on the highest variation in the amount of outstanding payments over a period of 180 days observed over the period December 31, 2011 – June 30, 2023 (currently EUR 34.9 million positioned on the first day).

## 5.5 CREDIT RISK

- Breakdown of the total of assets according to risk weightings:

The quality of Caisse Française de Financement Local's portfolio can be illustrated by the risk weighting assigned to each of its assets for the calculation of the bank's solvency ratio. This reflects the fact that for most of its assets, Caisse Française de Financement Local has opted for the advanced method of calculating regulatory capital requirements.

### Risk Weighting of Caisse Française de Financement Local's portfolio as of June 30, 2023:

This analysis confirms the excellent quality of the assets in Caisse Française de Financement Local's

portfolio:

- 84% of the portfolio has a risk weighting of 5% or less;
- 2% of the portfolio has a weighting greater than 20%.

The average risk weighting of assets is 4.6% versus 20% for European local government entities according to the Basel standard method.

- Bank counterparty risk

Caisse Française de Financement Local holds two types of exposure to banks:

- exposures on credit institutions in the amount of EUR 0.4 billion;
- derivative contracts, entered into within the framework of its management of interest rate and foreign exchange risks.

All of Caisse Française de Financement Local's derivative operations are conducted within the framework of standard ISDA or FBF (Fédération Bancaire Française) contracts with major international banks. These contracts have particular characteristics, since they must meet the standards set by rating agencies for sociétés de crédit foncier (and other issuers of covered bonds). Over the last few years, Caisse Française de Financement Local amended these contracts to take into account recent EMIR regulatory changes (signing of variation margin amendments). Caisse Française de Financement Local's derivatives are not subject to the clearing obligation nor the payment of initial margin. These interest rate and currency swaps all benefit from the same legal privilege as obligations foncières. For this reason, Caisse Française de Financement Local does not pay its derivative counterparties any collateral (or variation margin), whereas they have to pay Caisse Française de Financement Local except for some which benefit from the agencies highest short-term rating. At the end of June 2022, a new derivatives agreement was concluded with SFIL to which is attached only the derivatives that cover the few assets that are excluded from the cover pool from July 8, 2022 as part of the implementation of the covered bonds directive. Since these derivatives do not benefit from the privilege of the law, the agreement provides for the possibility of exchanging collateral in both directions. The collateral claim paid under this agreement is classified outside the cover pool, like the corresponding derivatives and their covered assets.

All derivative exposures as of June 30, 2023 are listed below.

EUR billions	Total of notional amounts	% of total notional amounts	Mark to Market		Collateral received	Collateral paid
			-	+		
Cover pool - external counterparties	74.0	83%	(1.7)	0.1	(0.1)	-
cover pool - SFIL	14.9	17%	(1.4)	-	-	-
Outside cover pool - SFIL	0.2	0%	(0.1)	-	-	0.1
<b>Total</b>	<b>89.1</b>	<b>100%</b>	<b>(3.2)</b>	<b>0.1</b>	<b>(0.1)</b>	<b>0.1</b>

As of June 30, 2023, Caisse Française de Financement Local was exposed (positive fair value of swaps) to nine bank counterparties, all of these paid cash collateral totalling EUR 0.1 billion, offsetting the total exposure.

The swaps negotiated with external counterparties represented 83% of outstanding swaps and those signed with SFIL 17%. The swaps signed with the five largest counterparties represented a total of 56% of notional amounts.

## 6. Coverage of liquidity needs

Information on the 180-day cash requirement and the hedging methods are presented in paragraph 5.4.

The graph below shows the distinction between capital flows and interest flows which constitute the 180-day liquidity requirement:

## 7. Maturity structure

EUR billion

Caisse Française de Financement Local does not hold any financial assets that include maturity extension triggers. It has not issued any *obligations foncières* that include maturity extension triggers. Certain *obligations foncières* include call options that can only be exercised by Caisse Française de Financement Local.

## 8. Level of coverage of privileged resources

The certified regulatory coverage ratio, corresponding to the situation as of March 31, 2023, amounts to 114.2%.
